U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No._

Application/Control Number: 09/053,872 Page 2

Art Unit: 1653

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 23-32, drawn to an assay to determine the anticoagulant activity of a
 Factor IXa compound, classified in class 435, subclass 13.
- II. Claims 33-37 and 52-57, drawn to a method of inhibiting thrombosis or clot formation, classified in class 424, subclass 145.1, and class 514, subclasses 2 and 44.
- III. Claims 38-51, drawn to pharmaceutical compositions comprising Factor IXa compounds, classified in class 424, subclass 145.1, and class 514, subclasses 2 and 44.

The inventions are distinct, each from the other, because:

Inventions III and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different method of using that product, such as the invention of Group II.

Inventions III and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP)

Application/Control Number: 09/053,872

Art Unit: 1653

§ 806.05(h)). In the instant case, the product as claimed can be used in a materially different method of using that product, such as the invention or Group I.

The inventions of Groups I and II are patentably distinct from each other because of the materially different method steps and the materially different results of each method. The invention of Group I is an in vitro method whose result is a numerical value characteristic of a Factor IXa compound. The invention of Group II is an in vivo method whose result is pharmaceutical treatment of a patient.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II or III, restriction for examination purposes as indicated is proper.

2. Regardless of the Group elected above, Applicants are further required to make the following election of species:

This application contains claims directed to the following patentably distinct species of the claimed invention: Claims 37, 41-44, and 46-51 set forth patentably distinct species of Factor IXa

Application/Control Number: 09/053,872

Art Unit: 1653

compounds, which are patentably distinct from each other because of their materially different structures.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 33-57 are generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1653

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

- 4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey E. Russel at telephone number (703) 308-3975. The examiner can normally be reached on Monday-Thursday from 8:30 A.M. to 6:00 P.M. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Christopher Low can be reached at (703) 308-2923. The fax number for Art Unit 1653 for formal communications is (703) 305-3014; for informal communications such as proposed amendments, the fax number (703) 305-7401 can be used. The telephone number for the Technology Center 1 receptionist is (703) 308-0196.
